PERSONAL PROFILE

Full Stack Developer with 3 years of experience transforming ideas into scalable SaaS products. Specialized in the Next.js and Supabase ecosystem, my approach combines product development agility with the solidity of Hexagonal Architecture and TDD. Beyond code, I bring a proactive vision to solve real business problems, as demonstrated in my SinFila project. I seek teams where transparency, technical quality, and continuous improvement are the norm.

- Next.js
- Supabase
- Shadcn
- Tailwind
- Git
- GitHub
- GitLab
- CI/CD
- React
- Angular
- HTML
- CSS
- JavaScript
- React MUI
- Angular Material
- Bootstrap
- Ant Design
- Python
- Flask (Python)
- Java
- Spring Boot (Java)
- Express.js
- SQL
- PostgreSQL
- MongoDB
- SCRUM
- PHP
- C++
- C#

WORK EXPERIENCE

Full Stack Developer | PVNUBE

September 2024 - May 2025 (Culiacán, Sinaloa)

Led the development and maintenance of critical modules for a manufacturing-focused ERP system, ensuring flexibility for various business types.

- Critical Module Development: Designed and implemented the Production and Projects module, optimizing process control for manufacturing companies.
- Full Stack Maintenance: Maintained and scaled the existing architecture, ensuring system operational stability.

PHPjQuerySQLHTML5CSS3

Software Developer | Grupo Coppel

September 2022 - September 2024 (Culiacán, Sinaloa)

Collaborated in the full corporate software development lifecycle, from maintaining legacy systems to implementing new cloud architectures.

- System Modernization: Participated in the development of the Cocrea system using a modern microservices-based architecture.
- Security & Integration: Implemented secure authentication using Microsoft Entra ID (Azure).
- Software Quality: Designed and executed automated test suites for APIs using Postman, reducing production errors.
- Backend & Legacy: Developed Stored Procedures in SQL Server and maintained critical components in C# (WinForms) and C++.
